[NOTE: The United States Patent and Trademark Office may require additional information if there is a question as to whether either the abandonment or the delay in filing a petition under 37 CFR 1.137(b) was unintentional (MPEP 711.03(c), subsections (III)(C) and (D)).]

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

Petition to Revive the above identified application pursuant to 37 CFR 1.137 (b)

Dear Sir:

This petition is respectfully presented to the Office in response to a Notice of Abandonment mail on November 15, 2006 and received today, November 20, 2006 wherein the above Application was declared abandoned.

The only reason to sustain the abandonment as indicated in marked-up block 3 of the Notice of Abandonment, (PTO-1432) is the failure to timely file corrected drawings as required the Notice of Allowability (PTO-37) dated on July 12, 2006.

The said Notice of Allowability properly requested on block 5 the correction of drawings as Replacement sheets that must be submitted indicating the changes required by the Examiner. The only change to the said drawing required by the Examiner was the elimination of the number 16 in Fig. 2; see Notice of Allowability on page 2 and 4.

Please consider in the evaluation process of the instant petition that the information presented in the Reply (Replacement Drawings) is identical to the information already in the Application, more particularly in page 4 of the Notice of Allowability (marked-up copy prepared by the Examiner), since the Examiner already eliminated the number 16 from Fig. 2, in proper compliance with MPEP 608.02 (w) and MPEP 1301.04

“Where an application is ready for issue except *for a slight defect in the drawing not involving change in structure*, the Examiner will prepare a letter to the Applicant indicating the change to be made and include a marked-up copy of the drawing showing the addition or alteration to be made. The marked up copy of the drawing should be attached to the letter to the Applicant and a *copy placed in the application file.*”

Therefore, by granting this petition no new set of drawings, neither new issues nor new amendments are intended to be entered to the instant application since the correction of a slight defect not affecting the structure of the drawing has been already made by the Examiner and is indeed part of the application. No new matter, neither whole set of drawings nor patentability issues are involve in providing the Office the requested Replacement sheet of the drawings.

The entire delay in filing the required reply form the due date for the reply until the filing of the grantable petition pursuant to 37 CFR 1.137 (b) was unintentional. The drawings were corrected by our graphic designer, on August 17, 2006 and it was believed that the proper reply was send by regular mail on August 18, 2006. Unfortunately, we do not have in our hands the supportive evidence required to support the reply sending to the Office.

Please find enclosed:

- copy of the proper reply as indicated by the Examiner in PTO-37, box 5: *a Replacement sheet of the drawings wherein the number 16 has been eliminated as requested by the Examiner;*
- A small entity petition fee pursuant 37 CFR 1.17 (m) for the amount of \$750.00;
- Petition for revival of an application for patent abandoned unintentionally under 37 CFR 1.137(b), PTO/SB/64 form.
- Self addressed Post Card

We also include herein and for your convenience:

- Copy of the Notice of Abandonment dated November 15, 2006
- Copy of the Notice of Allowability, dated July 12, 2006.

Since the instant Application was filed on 12/15/2003, it is believed that no terminal disclaimer is needed as pursuant 37 CFR 1.137(d).

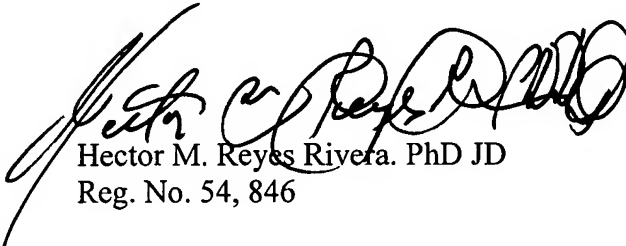

Granting this petition is respectfully requested and is greatly appreciated.

Please also find enclosed a *Supplemental Declaration for Utility pursuant to 37 CFR 1.67*

Although the said Supplemental Declaration has not been requested by the Office, it is he voluntarily submitted herein with the only purpose of correcting deficiencies or inaccuracies present in the earlier declaration.

If any additional information is required, please do not hesitate to contact me immediately, I can be reach at 787-467-5522 or 787 754-0855.

Respectfully,

Hector M. Reyes Rivera. PhD JD

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the drawings:

Amend the drawings as indicated in red ink on the attached sheet.

In the specification:

On page 17, line 18: after "concentration" insert --and/or fluoride salts--.

In claim 6:

Line 16: delete "main cylinder" and substitute --head--, delete "containing" and substitute --and said main cylinder contains--.

Claims 6-12 are allowed. It is noted that the amendment to the drawing was needed since reference character 16 is not present in the specification. The amendment to the specification was needed to provide a positive antecedent basis for the language in claim 8 (support for this language can be found on page 6, line 2, as originally filed). The amendment to claim 1 was needed to clarify that the outlet 15 is actually positioned in the head (as defined in original claim 1) and the cartridge is found in the main cylinder.
